

MAX UC FOR DESKTOP AND MOBILE.

Your working life moves constantly from desk to laptop to mobile smart phone to iPad. Now, you can use all the features of your Business Unlimited unified communications solution from almost any device at your desk, at home or on the move.

Business Unlimited can be used to make or receive calls from your desk phone, your PC or Mac and your mobile devices. Look up your contacts, make and receive voice or video calls or chat with colleagues, no matter which device you are using or where you are.

With MaX UC you can seamlessly move from device to device, or from cellular to Wi-Fi, even in the middle of a call.

Now you can work from anywhere, connected to your office phone number, with all the features you value so much when you're in the office.

SAVE TIME, DO MORE

These are just a few of the things you can do with MaX UC on your mobile phone, tablet or desktop PC when it is paired with Business Unlimited.

- + **Call from anywhere.** Make and receive calls on your mobile as though you were at your desk, with single number convenience.
- + **Receive calls on any device.** When someone calls your primary number, the call can appear on your desk phone, your mobile phone, your PC or Mac and tablet devices. You answer the call on whichever device is most convenient for you.
- + **Seamlessly transfer calls.** Take your call with you by switching it at any time between your desk phone, your mobile phone, or even to your tablet .
- + **Call Manager.** The Call Manager helps you control all your features. Call Manager makes it easy to mute calls, transfer calls, make three-way calls, place calls on hold, record calls (where local laws permit) and adjust the microphone or headset volume.
- + **Upgrade your calls to video.** If the person you're calling has a compatible service, you can choose to uplift the call to a video call.

CHOOSE HOW PEOPLE REACH YOU

Set up your call forwarding choices and "Do Not Disturb" options in the Call Manager. Choose to send all your incoming calls to another number or straight to voice mail. Specify special handling for calls from VIPs. Single number convenience means that your callers need only one number to reach you, but you choose where and when to be reached. The choices you make on one device can apply to all your connected devices. With Business Unlimited, you'll have more control over your working time to maximize your productivity.

POWERFUL FEATURES, EASY TO USE

One number reaches you wherever you are and allows you to manage your calls and contacts from anywhere.

- + **Integrate your contacts.** See and access all your contacts – including the corporate directory - in any device. MaX UC presents you with a consolidated list of contacts from several sources.
- + **Visual Voicemail.** Easily check your voice, video and fax messages from a single message center. Voice messages can be translated into text so you can read them without dialing in to retrieve them. Listen, delete or respond at the touch of a button.
- + **Conference calls.** It's simple to set up and manage audio conferences from your desktop.
- + **Chat.** You can use MaX UC to send instant messages to other people in your corporate directory who are using the same service, no matter what device they are using.
- + **Softphone for your PC.** Add a head set to your desktop or laptop then make and receive audio and video calls from your PC just like you would on your desk phone.

READY FOR BUSINESS

MaX UC is integrated with your hosted suite of business services. You can use the same valuable services that you see from your office extension such as 4-digit dialing, auto attendant and automated call distribution. Isn't it nice to have an integrated communications suite that's ready for business?

EASY SET UP

It's easy to download and install the app on your smartphone, tablet, PC or Mac.

MaX UC for Mobile works on these mobile devices:

- + Android phones and tablets with ARM chips running 2.3.3 (Gingerbread) or later version
- + iPhone running iOS5 or later.
- + iPad running iOS5 or later.
