

DEDICATED FIBER INTERNET FOR BUSINESS

The Future is in **Fiber**

Since 1905, Northland Communication has invested in the Central New York community, offering cutting-edge products and solutions that our customers can rely on.

With over 1100 miles of dedicated fiber throughout the region, we provide advanced networking solutions for local businesses. Northland Communications has the flexibility and capability to serve any business-from large telecommunication carriers to small businesses. Our dedicated fiber connections provide incredible download and upload speeds so that you can keep your operations running smoothly.

“Our fiber internet connection is reliable and fast so that you can focus on running your business.”

We offer both asymmetrical and symmetrical dedicated Fiber Internet that can be customized to fit your business communication needs. Our fiber network keeps your Internet connection reliable, fast, powerful, and secure so that you can focus on running your business. Northland's dedicated Fiber Internet also allows for full integration with our other bundled solutions.

Transform The Way Your Business Connects

The availability of high capacity and reliable bandwidth transforms your business' capabilities. Northland's fiber network creates new potential for enhancing existing resources and opens the door to advanced business opportunities:

- + **Productivity** - Speeds up existing network applications
- + **Backups** - Automates and improves your process using a third party backup service provider
- + **Cloud Services** - Eliminates bandwidth limitations for cloud-based applications
- + **Colocation** - Saves costs and locates your IT resources in Northland's managed data center
- + **Video Conferencing** - Reduces travel and meeting expenses
- + **Network Consolidation** - Leverage Northland's voice, data, and Internet services on one covered network
- + **Network Diversity** - Combines Northland's fiber with existing or alternative network connections to create an effective network disaster recovery plan
